Artificial Intelligence in Talent Conversations: Innovating Inclusive Tech – Learning from the Past to Unlock the Future

For many, the technology we use and the devices we own are extensions of ourselves. We seek not only personalization but also experiences that delight and enable our best work, drawing on past insights to unlock future potential.

For decades, Microsoft has been at the forefront of advancing inclusive experiences in tech. Join Lindsay-Rae McIntyre, Chief Diversity Officer and CVP of Talent Development, and her colleagues from Accessibility and Research, for an insightful discussion on how the AI era is transforming the evolution of products and culture.

This is a unique opportunity for Chief Diversity Officers and DEI senior leaders to learn from Microsoft's pioneering efforts in creating inclusive experiences both in tech and through tech. Discover how to build inclusive workplaces in this era of AI by leveraging Microsoft's innovative approaches.

August 8, 2024
